

Racing Update

This past Saturday was a soft opening for the upcoming season. Despite some areas getting rain in the morning (my house), the track got through their pre tech session. The GRS was there getting past members and new members registered. All had masks and were keeping separated as the track had requested. Next Saturday, June 6th will be a test and tune along with another pre tech area. The GRS will be set up to take registrations and answer questions from our members. The next registration will be at the first race on June 13th. We have had to cancel plans for member meetings before our first race, as we are unable to have enough board members present. As with everything else this year, we are doing the best we can with all that is going on. With that said the Board has taken a number of requests to extend the eligible year in the "MOD" class "ONLY" to 1976. As we will be very short of sponsor money this year, we thought it appropriate to extend the year to attract more cars for larger race day payouts and larger season ending awards money. Because this will be a trying year for everyone involved, especially our Sponsors, we thought this is best for our members. This is for a one year trial only. For that reason we are not adding the year change to the "MOD" rules. This will be by word of mouth from our members. Next year when we get back to a new normal, we will take a look at the year change to see if this is something we want to keep. Thanks for your patience. Be safe and see you soon. The GRS BOD
